DISCOVER BERGADANA

Transforma 21 S.L. is a carbody maker with over 50 years of experience in transforming and producing police vehicles, sold under the Bergadana brand.

The police vehicle selection is one of our company's main lines. Our long experience in this sector and belief in innovation has made us a leader. This means top government security forces trust us.

Another key to this trust lies in the quality of our transfor-

mations. They are all guaranteed by the ISO 9001 certification, just like the environmental management system that is certified by ISO 14001.

In order to guarantee utmost peace-of-mind, we provide all our transformations with a two-year warranty, in addition to specialised after-sale service, in order to give a rapid response to all situations.

Our sweeping, modern facilities, along with out assembly chain system, mean we can transform a great number of vehicles per year.

PATROL VEHICLES

Reliable design intended to make the force's day-to-day life easier

The patrol vehicle line includes units designed to provide a rapid, effective response to emergency situations. This category includes patrol cars, traffic vehicles, camouflaged units, and more.

Each force's different needs and preferences for different brands and manufacturer models has made Bergadana a versatile company that can adapt to each different scenario.

Security, comfort, and functionality are very important aspects in these vehicles. This is what Bergadana focuses the bulk of its effort on.

- Security, comfort, and functionality in each transformation
- Available for any vehicle brand and model
- Endless transformation possibilities
- Innovation through the use of technology CPI (ABS thermoforming)
- Efficient sound-light signage system
- Independent electric system with protection against surges and interference

Top quality and security during travel

DETAINEE KIT

- Secure, ergonomic, and high-quality detainee transfer system
- Resistant detainee area, without sharp edges or dangerous elements
- Equipped with different drains on the floor and seats to facilitate cleaning
- Includes its own lighting system and the possibility of installing video surveillance cameras
- The seats are ergonomic and adapt to the detainee's position with hands cuffed behind their back
- The kit can be disassembled and is easy to repair if needed

Bergadana's detainee kit was developed to provide the highest standards in terms of security, comfort, and quality, both for police forces and for detainees.

This is an isolated, independent cell with **capacity for up to two detainees** with their hands cuffed behind their backs.

Unlike other systems, Bergadana's detainee kit **makes the most use of the interior space**, thus maintaining travel room for the front seats and the boot volume.

This system **fulfils all applicable standards** (R14, R16, R17, and R21).

Bergadana has currently developed this kit for the following vehicles: **Seat Ateca and Ford Kuga.**

RIOT VEHICLES

A secure response to all situations

Designed to address extreme situations, Bergadana's riot vehicles are the company's **utmost expression of security, quality, and innovation**.

Thanks to this and vast experience, Bergadana has earned the trust and support of the nation's leading security forces in recent years.

As a result of this experience and innovation, Bergadana is pleased to present a line of riot vehicles, **available in different models and brands**.

From the outside, the vehicle's visibility and protection are essential to guarantee top security. The inside perfectly meets each client's needs in terms of functionality and comfort.

- Interior lighting system with different light levels
- Rear polycarbonate windows with a high level of impact resistance
- Exterior defence and protections to guarantee top security
- Stands and attachments adjusted to the devices used
- Bercomplex furniture adapted to the police force's needs
- With capacity for 8 authorised seats
- Interior covering with ABS thermoforming, also known as "CPI Technology"
- Independent electric system with protection against surges and interference
- Available on L2H2 and L2H1 lorries of any mark and model
- High-performance and approved LED exterior light signal system
- Independent HVAC system (cold and hot air) and ventilation system

OFFICE VEHICLES

A functional, personalised workspace

Work or citizen service vehicles have a **true workspace** inside to provide services to citizens.

Optimising and making the most of space in these units is vital, which is why Bergadana conducts a previous study on client and vehicle needs to offer a **totally adapted solution**.

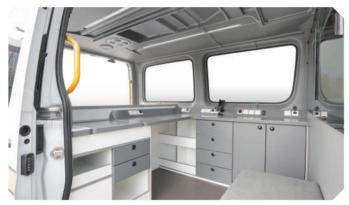

Possibilities are practically unlimited, since the furniture made with Bercomplex perfectly adapts to the police force's needs. What is more, this transformation is suitable for all kinds of L2H2 and L2H1 lorries.

- The furniture made with Bercomplex provides personalised configuration, based on the force's needs
- Interior lighting system with different light levels
- Number of seats based on client needs
- Interior covering with ABS thermoforming, also known as "CPI Technology"
- Independent electric system with protection against surges and interference
- Available on L2H2 and L2H1 lorries of any mark and model
- High-performance and approved LED exterior light signal system

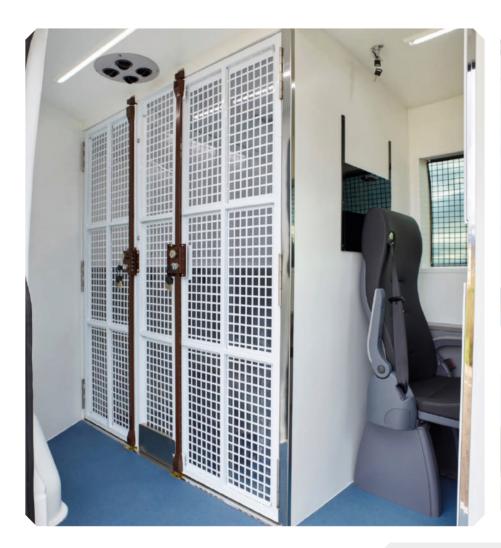

CELL VEHICLES

Risk-free transfers with highest performance

Bergadana has great experience in transforming cell or prisoner-transfer vehicles.

When developing these vehicles, **quality and security are very important**. They are designed to reduce risks and guarantee utmost safety during travel.

The modules where detainees travel are entirely isolated and adapted to each force's needs. The doors have an electronic security lock, controlled through the Can Bus system.

To avoid all escape, all windows have a protection system.

For **top security**, these systems also have emergency exits in the roof, and the floor in the detainee area is armoured.

Surfaces are smooth and different drains were built in to facilitate cleaning and disinfection.

- The furniture made with Bercomplex provides personalised configuration, based on the force's needs
- Personalised interior lighting system
- Number of seats based on client needs
- Electronic lock with the Can Bus system
- Independent electric system with protection against surges and interference
- Available on any L2H2 and L2H1 lorry model
- High-performance and approved LED exterior light signal system

Personalised work with the utmost guarantee

SPECIAL UNITS

- Vehicles for underground units
- LRAD vehicles
- Bomb deactivation units
- Special ops units
- Canine transport units
- Drone units

Bergadana has a technological department with a team of professionals who have vast experience and training. The purpose of this team is to provide tailored solutions that meet the force's needs.

In this regard, **possibilities for transformation are vast**: frame modifications, elevated ceilings, double cabins, surveillance systems, etc.

With all of them, the end goal is customer satisfaction with quality, security, efficiency, and functionality.
