BERGADANA

Bergadana's hearses, an expression of the passion and experience of a leading brand in vehicle transformation

Discover
Bergadana

HEARSES CATALOGUE

Bergadana is pleased to present a wide range of hearses in this catalogue, divided into two categories: service hearses, used during ceremonies, and collection hearses, used for legal services and transfers.

Most service hearses are framed on a Class E series 213 Mercedes Benz, with diesel, gasoline, and hybrid engines.

However, electric mobility is becoming more important in the hearse sector. In this regard, Bergadana stands out as one of the first brands to introduce an electric hearse.

Bergadana currently has two 100% electric hearses, the eAtys model, available on the Mercedes Benz eVito frame, and the Lumen model, on the Nissan Leaf frame.

Additionally, legal transfer or collection hearses are noteworthy for their highly versatile transformation, capable of entirely adapting to any type of van.

DISCOVER BERGADANA

Transforma 21 S.L. is a bodywork company specialised on transforming and producing service and collection hearses sold through Bergadana.

A company with a firm commitment to quality in innovation and the environment, proven by the European certification ISO9001 and ISO 14001.

Aura

*When basic elegance
reasserts itself*

Service
Hearses

The **AURA** is a safe bet on quality and functionality, without sacrificing an elegant design. Its imposing size shows a strong personality, while the sport lines announce agility in all senses of the word.

The perfect balance between functionality, symmetry and volume.

The built-in window in the divider provides for perfect rear vision, facilitating manoeuvres inside and outside the cemetery.

ROBUST AND PRAGMATIC

The extensive glass surface allows natural light to enter through the side windows. The side holds have high storage capacity.

CUSTOMISED INTERIOR

The minimalist design of the material around the central platform and the interior symmetry highlight the centre of the space, putting the spotlight on the casket during ceremonies. Thanks to the wide variety of colours and materials, the interior can be customised and adapted to the client's taste.

Classic

The perfect fusion

Service
Hearses

The **CLASSIC**, is faithful to the American limousine's traditional design, adapted to the features and requirements of the European market.

Timeless design that seeks to pay tribute to the classic hearse.

The landau detail and glass contours highlight its singularity.

AMERICAN INSPIRATION

The exterior details reassert its identity, while the vinyl-textured real surface brings singularity and elegance. The quadrilateral design of the rear windows brings privacy and comfort. The chrome landau installed on each one of the rear sides pays tribute to the classic limousine design.

ELEGANCE AND CLASSIC STYLE

The interior design is marked by elegance, blending minimalism and the geometry of the central platform with the sides' texture, guaranteeing functionality and comfort at all times.

Thanks to the wide range of colours and materials, the interior finishes can be customised based on client taste.

Solaris

*Modern luxury
takes shape*

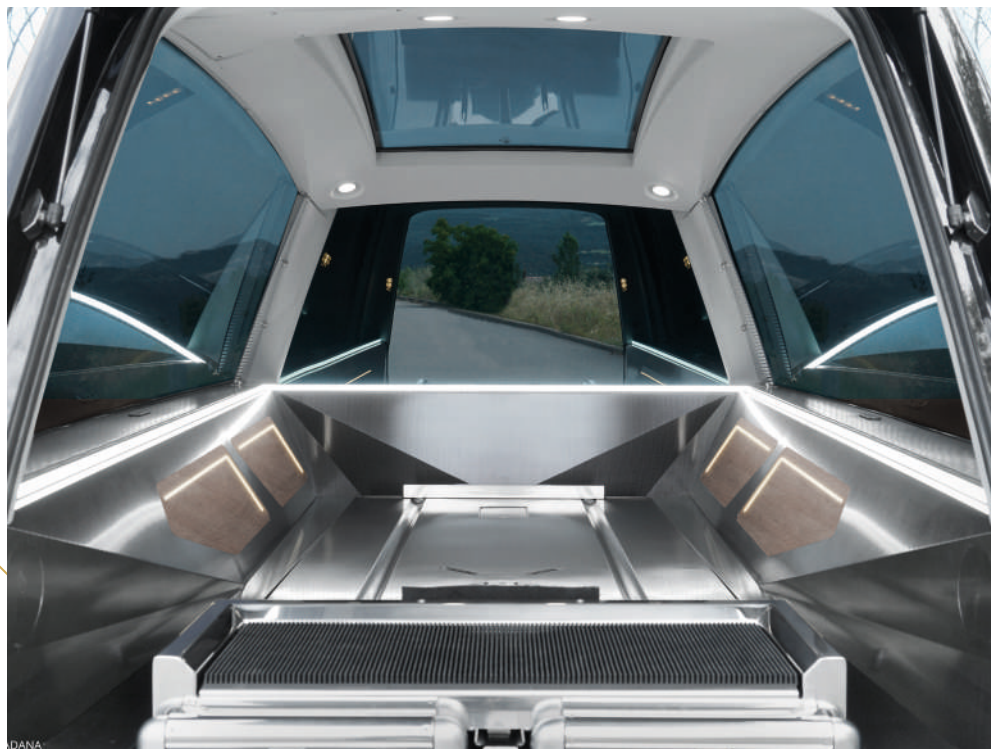

Service
Hearses

The **SOLARIS**, a model designed for the most demanding professionals in the funeral industry.

The sum of the small details makes for a luxurious, extremely elegant design as a result, where lighting plays a highly important role in configuration.

The built-in window in the divider provides for 360° vision from the driver's seat, facilitating manoeuvres inside and outside the cemetery.

ONE-OF-A-KIND LIGHT

The large glass surface allows natural light to enter the rear space, penetrating the side windows and the sunroof. This accentuates the interior space and endows the ensemble with singularity. The different interior lighting packages provide for creating different ambiances, depending on the occasion's requirements.

STUNNING INTERIOR

The interior stainless steel gloss-black interior creates a mirror effect, with a multitude of nuances and depths. Bertex finishes armour and protect interior surfaces, resulting in a superior finish that is easy-to-clean with greater resistance.

The storage spaces in the side holds means that different elements can be safely and efficiently stored.

Stylo

*The hearse
that stands out*

Service
Hearses

The **STYLO** model is the encapsulation of a long history condensed into a compact, lightweight model.

An urban, functional model, where the exclusive, avant-garde lines embody a modern, sporty style.

Broad field of vision from the driver's seat. Thanks to the built-in window in the divider, manoeuvres inside and outside the cemetery are facilitated.

Service
Hearses

BERGLASS TECHNOLOGY

The panoramic windows in the rear space offer a comprehensive view of the interior, highlighting protagonism when the occasion requires. Optionally, Berglass technology provides for total and absolute control over the opacity of side windows.

A TRENDSETTING LINE

The both minimalist and functional design of the interior space provides a feeling of openness and serenity. It also provides for customised configuration, thanks to the wide range of colours and materials. The side holds can store different elements safely and efficiently.

Duat

*Urban style,
sporty expression*

Service
Hearses

The **DUAT** model, with a lightweight, elegant appearance, sporty and versatile design, prepared for the most difficult environments. It guarantees excellent control over the vehicle and perfect adherence to the road at all times.

Besides allowing natural light in, the side window design endows the ensemble with elegance, making the actual size seem larger.

AGILE AND AUDACIOUS

The distance between the axes is shorter than with other models, providing greater vehicle control. This makes it easier to manoeuvre in difficult settings.

INTERIOR DESIGN WITH A PERSONAL TOUCH

A minimalist design that highlights the centre of the space, putting protagonism on the casket during the ceremony. The combination of materials and colours provides for endless possibilities in the interior.

Osiris

*Its identity lies
in the shape*

Service
Hearses

The **OSIRIS**, a solid, lightweight model that perfectly matches a sporty, agile personality with the classic American essence.

The chrome details, such as the landau installed on the exterior sides, show this American style.

The compact design and shorter distance between axles than other models provides for absolute control over the vehicle and excellent manoeuvrability in difficult settings.

SIDE AND REAR ACCESSIBILITY

The interior is accessible from the rear door and through the two side doors, provide for perfect handling of floral pieces.

The wide range of colours and materials provide for customisation and adaptation of interiors based on the client's taste.

AMERICAN INSPIRATION

Maintaining the two original rear side doors, except for a greater distance between axes, the OSIRIS still has the original vehicle's dimensions.

The American inspiration is in its exterior design, with the rear part textured and the landau installed on each of the sides.

Lumen

*Welcome to
a carbon-free world*

Service
Hearses

The **LUMEN** hearse captures perfectly the future funeral industry image. Its modern and trend-setting shapes drive us into a new age. In parallel, a noiseless and carbon-free future becomes reality thanks to a full electric powerful engine.

Matching potency and technology with a high performance battery, this particular hearse is one of the most advanced vehicles in its segment, exceeding a surprising range.

EXQUISITE MINIMALIST STYLE

The Lumen inner design is at the time minimalist and elegant. All lines take you in the same direction: the coffin, the protagonist of all ceremonies. The lightweight materials, such as ABS, employed for the inner hearse cladding, also help to reduce weight and increase the vehicle's range

AERODYNAMIC AND SPORTS

Bergadana made a great effort to reduce and cut down on vehicle consumption: the Lumen's aerodynamic and sports lining reduces airflow resistance and increases the vehicle range.

Atys

Versatile and limitless

Service
Hearses

The **ATYS** model maintains exterior lines. It is mounted on a Mercedes Benz Vito, available with diesel or electric engine, prepared and designed to transfer up to two caskets, and to also conduct funeral ceremonies and transfer services.

SPACE AND STORAGE CAPACITY

The right-hand side hold and the bottom of the central platforms guarantee professionals high storage capacity.

PLATFORM FOR FLORAL PIECES

Additionally, an automatic tray built-in to the interior ceiling of the rear space to place floral pieces is offered.

Funeral Transport Collection

A World of Possibilities

Funeral
Transport Collection

Bergadana's line of collection hearses was designed to provide legal and normal transfer services to the funeral home.

Inside, there is capacity for up to 4 deceased, split into two levels. On the bottom level, a system to anchor two boxes or two stretchers or a combination of the two may be installed. The upper level is an open space, with capacity for two caskets.

The combination of materials such as Thermoformed ABS (CPI technology) provides exceptional design, while the stainless steel used for the platforms and different fixation systems brings the durability and resistance necessary for this sort of vehicle.

In this regard, we should highlight Bergadana's incredible ability to adapt with this kind of transformation. Possibilities are endless, since any kind of van can be transformed.

Bergadana also studies the client's needs beforehand to guarantee an accurate and precise transformation.

Funeral
Transport Collection

WITH NO ENVIRONMENTAL FOOTPRINT

The materials used during the transformation of these vehicles are 100% recyclable. In the same fashion, LED technology and lightweight materials like Thermoformed ABS help to reduce fuel consumption and gas emissions.

TRANSFORMATION, NO MATTER THE BRAND

Collection hearses can be made out of any sort of L1H2 van, such as: Mercedes Benz Vito, Renault Transit, Peugeot Expert, Citroen Jumpy, Nissan NV300, Fiat Talento, Opel Vivaro...

INTERIOR COVERS WITH THERMOFORMED ABS (CPI TECHNOLOGY)

One of the ways that Bergadana most stands out is the use of Thermoformed ABS or CPI Technology for side and ceiling coverings. This material not only provides for complete integration of the heating/cooling and lighting system, but also brings several benefits.

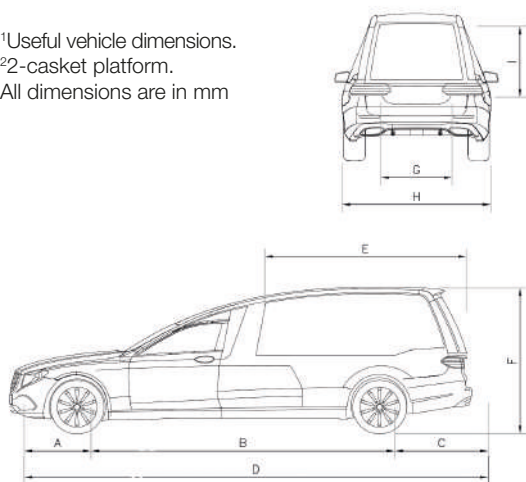

- 100% recyclable material.
- Easy-to-clean and resistant to different chemical agents used during cleaning.
- Very lightweight material in comparison with other conventional alternatives.
- Blow-resistant and long-lasting over time.

MULTIPLE LAYOUTS AND POSSIBILITIES

The interior has several accessories and possibilities. They range from adding a second level with hydraulic hoisting, systems that guarantee privacy and conceal content, and acoustic-light signalling systems, to auxiliary furniture.
