# Ambulance Dauer, Safety and comfort during the journey

TYPE A2 AMBULANCE  
EN 1789:2020

[www.bergadana.com](http://www.bergadana.com)

The **Daurer ambulance** represents an advance in non-urgent medical transport by prioritizing safety, passenger comfort, and compliance with EN1789:2020 regulations

Bergadana's technological department has focused its efforts on developing a safer and more comfortable ambulance that maximizes the use of interior space.

Daurer is classified as a type A2 non-emergency ambulance. It has been **developed on the L2H2 chassis of Renault Master, Nissan Interstar, Ford Transit, and Mercedes Benz Sprinter.**

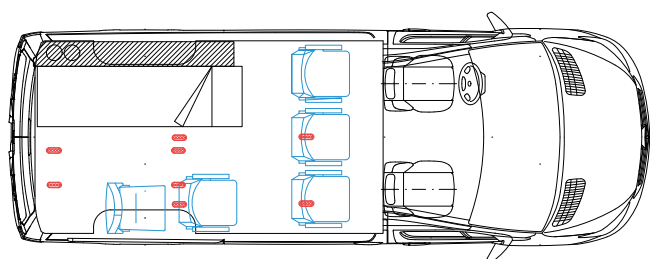

This ambulance model complies with the EN1789 regulation for road medical transport. Similarly, it has been developed under quality criteria recognized through ISO9001 certification and environmental criteria recognized through ISO14001 certification.

	The lateral and ceiling coverings are made with thermoformed ABS (CPI technology).		Developed under quality and environmental standards certified through ISO9001 and ISO14001.
	The ambulance features a CAN BUS electrical system with LED lighting and air conditioning.		Up to 9 approved seats with three-point seatbelt and warning sensor.
	In compliance with the European regulation EN1789:2020.		Integrated wheelchair restraint systems in the vehicle floor and adjustable headrest integrated in the ceiling.
	The transformation comes with a 3-year warranty.		Wheelchair access system through manual or electric ramp for people with disabilities.

Type A2 ambulance with a 3500 kg MMA. Available on Mercedes Benz Sprinter, Renault Master, Nissan Interstar, and Ford Transit.

Maximum capacity of 9 seats combined with wheelchairs, stretchers, and seats.
