

BERGADANA

Ambulance Sago, Design, Technology, Comfort, and Future.

TYPE A1 AMBULANCE
EN 1789:2020

www.bergadana.com

*The **Sago ambulance**,
the most comfortable,
practical, and functional
solution in non-urgent
transport type A1
compliant with current
regulation EN1789:2020.*

Bergadana presents the Sago model, a functional, comfortable, and safe solution for non-urgent transport type A1 medical transport. This model is **available on the L2H1 chassis of Mercedes Benz Vito/eVito, Renault Traffic, and Nissan Primstar**, and has been developed in compliance with the EN1789:2020 regulations.

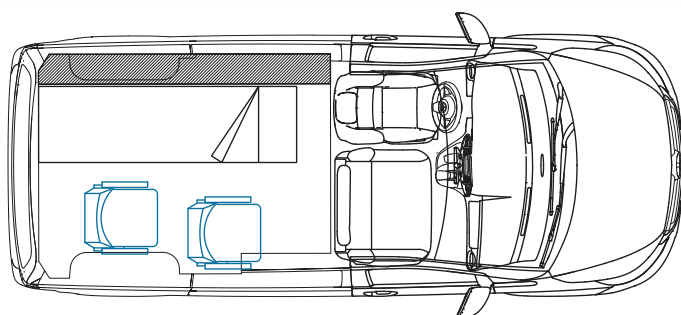

The interior of the Sago model stands out for the use of thermoformed ABS, also known as CPI Technology. This technology allows furniture and lining to be fused into a single piece, offering an optimized, lightweight, safe, edge-free, and easy-to-clean medical unit.

Additionally, the Sago model has been developed following recognized quality and environmental criteria through European certifications ISO9001 and ISO14001. This guarantees compliance with the highest quality and sustainability standards during the transformation process.

	Side and roof linings made of thermoformed ABS (CPI Technology).		Developed under quality and environmental standards certified through ISO9001 and ISO14001.
	CAN BUS electrical system with LED lighting and air conditioning system.		Up to 6 approved seats with three-point safety belts and warning sensors.
	In accordance with the European regulation EN1789:2020.		Available on L2H1 chassis; Mercedes Benz Vito/eVito, Renault Trafic, and Nissan Primstar.
	3-year warranty on the transformation.		All locks, bars, and supports have successfully passed the 10G test.

*A1 Ambulance. Available on
Mercedes Benz Vito/eVito, Renault
Trafic, and Nissan Primstar.*

*Maximum capacity of 6
seats with the stretcher.*
